

Multi-Cleaner DC-5000

Powerful Cleaner

Aerosol 500 g/can, 20cans/Box

Features

Cleanliness

Excellent cleaning power harmonized with evaporation can remove oil, grease, dust or flux on the surface of object easily.

Stability

Having special features of electro-induction, incombustibility, non-explosiveness and low-toxic, it is used safely while operating.

Uses

Cleaning of oil, grease and dust of machinery

Cleaning of motor, generator, engine etc.

Cleaning of spark plug, circuit-breaker, valve etc.

Cleaning and degreasing of crank case, break pad, cylinder, spring etc.

High Voltage Cables Cleaning

How to use

Cleansing by Spraying : Spray about 20-30 cm away from the object.

Dipping Method : Grease or oil stain can be dissolved and cleaned when the object dips into the multi-cleaner, DC-5000.

Brushing Method : When you clean severely polluted materials within a short time, you have to dip it in the fluid of multi-cleaner and brush it for effective cleaning. You have to choose a brush for cleaning of the nonferrous metals or plastic products carefully.

Spray Method : Excellent cleansing effect against non-soluble contaminants such as dust by using solubility and spray pressure of Multi-Cleaner DC-5000.

Ultra-Sonic Method : Excellent cleaning effect using vibration of fluid of ultra-sonic cleaner.

Cautions

Test is required before applying.

This should be used only for its intended purpose.

Ventilation is necessary when using the cleaner.

Do not inhale it for a long period of time.
