

K1

Antirust Lubricant

Aerosol 420ml/can, 20cans/Box

Features

K1 is lubricating, rustproof, permeating agent for protecting all types of metals by forming a thin oily film on a metal surface. K1 boasts of excellent moisture displacement force and permeability to be particularly adequate to storage of outdoor electrical systems and general electrical appliances. Furthermore, K1 is excellent in dehumidifying force to prevent electrical products from being short-circuited, and protect against rust and corrosion.

K1 is further excellent in operability over other competitive products of same applications due to much upgraded rustproof performance and less odor. (Twice the rustproof performance over that of other competitive products)

Rustproof performance test (Salt water spray-KS M 2109)

Division	6 hours elapsed	12 hours elapsed	24 hours elapsed (Indoor storage standard: More than 1 months)

※ Indoor storage standard: The indoor storage standard may be changed in response to cleanness of material and ambient environments.

Applications

Electronic appliances•furniture and fixture: TV, electric fans, air conditioners, hinges, telephones, door locks, VTRs, sewing machines, washing machines, etc

Leisure–sports items: golf sets, fishing gears, guns, climbing items, musical instruments, tennis rackets, skates, skis, toys, etc

Vehicles•transportation machines: bicycles, motorcycles, agricultural machines, ships, airplanes, cranes, tools, passenger cars, etc.

Office supplies•electronic appliances: computers, copiers, facsimile machines, telephone sets, chairs, cabinets, document shredders, etc.

How to use

It is more effective to clean foreign objects before application.

Spray in full for maintaining an even lubrication, rustproof protective film.

Use an extension tube for spraying on an area difficult to be reached.

Apply DC-5000 or MC-2 for easy cleaning of a K2 film.

Cautions

Remove dust or dirt off applied surface to apply it. Use brush or sand paper to remove rust or scale and apply it.

Do not spray directly onto the face or food. Do not inhale or intake.

Keep it out of the reach of children.

As this is an inflammable product using high pressure gas, keep the following cautions carefully.

1. Do not spray directly toward open flame.
2. Do not use it near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
3. Do not use it in an environment where there are explosive or inflammable materials.
4. Store the product in places where the temperature does not exceed 40°C.
5. After used in enclosed areas, be sure to ventilate.
6. Do not throw into a fire.
7. After use, throw it away after checking and removal the remaining gas in the container.
8. Do not store it in enclosed area.
9. Below 5°C, injection power may be poor.
